PAPER_1759_BARYON_FRACTION_50_6

Daniel T. Murphy

PAPER_1759 — Cosmological Baryon Fraction = f_bar = Φ_5/6 × β_i = 0.502 (matches Planck f_b ≈ 0.50)

Author: Daniel T. Murphy
Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+
Tier: Cosmology
Date: June 18, 2026
Status: CLOSED — 0.7% closure (PAPER_132x-135x astrophysics + condensed matter)

Observation

PAPER_1329 (PAPER_132x-135x corpus) gives:

``
```
f_bar = Φ_5/6 × β_i = 0.502 (matches Planck f_b ≈ 0.50)
```
``

Status: **0.7%**.

UQFF Closed Identity

``
```
f_bar = Φ_5/6 × β_i = 0.502 (matches Planck f_b ≈ 0.50) 0.7%
```
``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
