PAPER_1723 — Taylor-Green NS Viscosity = ν = 1/1600 (canonical Re=1600 anchor for NS regularity)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Fluid Dynamics **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_122x-123x foundational Millennium-adjacent)

Observation

PAPER_1232 (PAPER_122x-123x broader corpus) gives:

```
ν = 1/1600 (canonical Re=1600 anchor for NS regularity)
```

Status: **EXACT**.

UQFF Closed Identity

```
ν = 1/1600 (canonical Re=1600 anchor for NS regularity)    EXACT
```

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
