PAPER_1757 — Galaxy Main Types Count = n_types = D_phys = 4 (E, S, Irr, dwarf)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Galaxy Classification **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_132x-135x astrophysics + condensed matter)

Observation

PAPER_1328 (PAPER_132x-135x corpus) gives:

`n_types = D_phys = 4 (E, S, Irr, dwarf)`

Status: **EXACT**.

UQFF Closed Identity

`n_types = D_phys = 4 (E, S, Irr, dwarf)    EXACT`

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
