PAPER_1662_GLASS_TG_OVER_TM_3_4

Daniel T. Murphy

PAPER_1662 — Glass Transition T_g/T_m = T_g/T_m = (D_phys–1)/D_phys = 3/4 = 0.75

Author: Daniel T. Murphy
Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+
Tier: Glass Formation
Date: June 18, 2026
Status: CLOSED — EXACT closure (PAPER_134x broader corpus)

Observation

PAPER_1354 (PAPER_134x condensed matter / quantum sector) gives:

``
```
T_g/T_m = (D_phys–1)/D_phys = 3/4 = 0.75
```
``

Status: **EXACT**.

UQFF Closed Identity

``
```
T_g/T_m = (D_phys–1)/D_phys = 3/4 = 0.75 EXACT
```
``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Experimental glass formation measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
