Observation

PAPER_1209CC_S606 (Geophysics Unified Proof Set) gives:

``
```
d_ocean = D − F·D + F = 4 − 0.4 + 0.1 = 3.7 km
```
``

Residual: **EXACT**.

UQFF Closed Identity

``
```
d_ocean = D − F·D + F = 4 − 0.4 + 0.1 = 3.7 km EXACT
```
``

The formula uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical geophysics measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
