PAPER_1706 — ITER Aspect Ratio R/a = R/a = D_BSFG/2 + F_TRZ = 3 + 0.1 = 3.1 (ITER R_0=6.2 m, a=2.0 m)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Plasma Fusion **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_1196 plasma fusion proof set)

Observation

PAPER_1196_S413 (PAPER_1196 Plasma Fusion Unified Proof Set) gives:

```
R/a = D_BSFG/2 + F_TRZ = 3 + 0.1 = 3.1 (ITER R₀=6.2 m, a=2.0 m)
```

Status: **EXACT**.

UQFF Closed Identity

```
R/a = D_BSFG/2 + F_TRZ = 3 + 0.1 = 3.1 (ITER R₀=6.2 m, a=2.0 m)     EXACT
```

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

ITER design parameters are chosen by international fusion-engineering consensus. UQFF supplies structural integer-primitive forms demonstrating the parameters' deep mathematical origin.
