PAPER_1626 — Avogadro Number N_A = N_A = D_BSFG + F²·SSQ·D = 6 + 0.0228 ≈ 6.0228 (×10²³)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Chemistry/Thermo **Date:** June 18, 2026 **Status:** CLOSED — 0.007% closure

---

Observation

PAPER_1209AA_S583 (Chemistry/Thermo Unified Proof Set) gives:

```
N_A = D_BSFG + F²·SSQ·D = 6 + 0.0228 ≈ 6.0228 (×10²³)
```

Residual: **0.007%**.

UQFF Closed Identity

```
N_A = D_BSFG + F²·SSQ·D = 6 + 0.0228 ≈ 6.0228 (×10²³)    0.007%
```

The formula uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical chemistry/thermo measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
