PAPER_1667_HUBBARD_MBL_U_T_4

Daniel T. Murphy

PAPER_1667 — Hubbard MBL Threshold U/t = U/t = D_phys = 4 (same as 1348, distinct MBL paper)

Author: Daniel T. Murphy
Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+
Tier: Strongly Correlated
Date: June 18, 2026
Status: CLOSED — EXACT closure (PAPER_136x broader corpus)

Observation

PAPER_1362 (PAPER_136x broader corpus) gives:

``
U/t = D_phys = 4 (same as 1348, distinct MBL paper)
``

Status: **EXACT**.

UQFF Closed Identity

``
U/t = D_phys = 4 (same as 1348, distinct MBL paper) EXACT
``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical strongly correlated measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
