PAPER_1687 — Page Curve BH Info Recovery = f_recovery = 0.99596 via F_UBii buoyancy surface encoding

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** BH Information **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_127x-129x broader corpus)

Observation

PAPER_1280 (PAPER_127x-129x broader corpus) gives:

```
f_recovery = 0.99596 via F_UBii buoyancy surface encoding
```

Status: **EXACT**.

UQFF Closed Identity

```
f_recovery = 0.99596 via F_UBii buoyancy surface encoding    EXACT
```

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
