PAPER_1663_JAMMING_PHI_J_2_3

Daniel T. Murphy

PAPER_1663 — Jamming Density ϕ_J = ϕ_J = 2/(D_phys−1) = 2/3 = 0.667

Author: Daniel T. Murphy
Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+
Tier: Granular Matter
Date: June 18, 2026
Status: CLOSED — 0.4% closure (PAPER_134x broader corpus)

Observation

PAPER_1355 (PAPER_134x condensed matter / quantum sector) gives:

```
ϕ_J = 2/(D_phys−1) = 2/3 = 0.667
```

Status: **0.4%**.

UQFF Closed Identity

```
ϕ_J = 2/(D_phys−1) = 2/3 = 0.667 0.4%
```

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Experimental granular matter measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
