PAPER_1651 — Cosmic Filament Dimension = D_filament = D_phys / 2 = 2.0 (1D cosmic web)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Large-Scale Struct **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (broader-corpus PAPER_13xx mine)

Observation

PAPER_1330 (PAPER_13xx broader corpus) gives:

```
D_filament = D_phys / 2 = 2.0 (1D cosmic web)
```

Status: **EXACT**.

UQFF Closed Identity

```
D_filament = D_phys / 2 = 2.0 (1D cosmic web)    EXACT
```

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical large-scale struct measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
