PAPER_1734_KBASIS_25_3_UNIVERSAL

Daniel T. Murphy

PAPER_1734 — K_MEX·D_phys = 25/3 Universal Ratio = K_MEX·D_phys = 25/3 universal class (governs neutron, smooth Poincaré)

Author: Daniel T. Murphy
Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+
Tier: UQFF Foundational
Date: June 18, 2026
Status: CLOSED — EXACT closure (PAPER_1240-1270 broader corpus)

Observation

PAPER_1166 (PAPER_1240-1270 broader corpus) gives:

``
`K_MEX·D_phys = 25/3 universal class (governs neutron, smooth Poincaré)`
``

Status: **EXACT**.

UQFF Closed Identity

``
`K_MEX·D_phys = 25/3 universal class (governs neutron, smooth Poincaré) EXACT`
``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
