

PAPER_1209-CC: UQFF Geophysics Unified Proof Set — Seven Exact Closures Including $R_{\oplus}$, Core, Crust, Ocean, Kármán Line

Daniel T. Murphy

May 16, 2026

Locked Primitives

$F_{\text{TRZ}} = \frac{1}{10}$, $\Phi_{\text{res}} = \frac{5}{6}$, $[\text{SSq}] = \frac{57}{100}$, $K_{\text{Mex}} = \frac{25}{12}$, $D_{\text{phys}} = 4$, $D_{\text{BSFG}} = 6$, $D_{\text{crit}} = 26$, $N_{\text{ch}} = 9$,
 $\text{SO5} = 10$, $A_5 = 60$.

Closures S603–S612

S603 — Earth radius km, target 6371 [EXACT]

$$A_5 \text{SO5}^2 + A_5 D_{\text{BSFG}} + \text{SO5} + F_{\text{TRZ}} \text{SO5} = 6000 + 360 + 10 + 1 = 6371.$$

S604 — Earth core radius km, target 3485 [EXACT]

$$A_5 \text{SO5} D_{\text{BSFG}} - \text{SO5}^2 - D_{\text{BSFG}} - N_{\text{ch}} = 3600 - 100 - 6 - 9 = 3485.$$

S605 — Continental crust thickness km, target 35 [EXACT]

$$D_{\text{crit}} + N_{\text{ch}} = 35.$$

S606 — Ocean average depth km, target 3.7 [EXACT]

$$D_{\text{phys}} - F_{\text{TRZ}} D_{\text{phys}} + F_{\text{TRZ}} = 4 - 0.4 + 0.1 = 3.7.$$

S607 — Oceanic Moho km, target 7 [EXACT]

$$D_{\text{BSFG}} + F_{\text{TRZ}} \text{SO5} = 7.$$

S608 — Mariana Trench km, target 11 [EXACT]

$$\text{SO5} + F_{\text{TRZ}} \text{SO5} = 11.$$

S609 — Mt. Everest km, target 8.848 [0.019%]

$$K_{\text{Mex}} D_{\text{phys}} + [\text{SSq}] - F_{\text{TRZ}} [\text{SSq}] = 8.333 + 0.57 - 0.057 = 8.846.$$

S610 — Kármán line km, target 100 [EXACT]

$$\text{SO5} \cdot \text{SO5} = 100.$$

S611 — Earth age Gyr, target 4.54 [0.007%]

$$D_{\text{phys}} + F_{\text{TRZ}} D_{\text{phys}} + F_{\text{TRZ}} \Phi_{\text{res}} + F_{\text{TRZ}} [\text{SSq}] = 4 + 0.4 + 0.0833 + 0.057 = 4.5403.$$

S612 — Earth orbital velocity km/s, target 29.78 [0.026%]

$$N_{\text{ch}} + \text{SO5} + \text{SO5} + \Phi_{\text{res}} - F_{\text{TRZ}}^2 D_{\text{phys}} - F_{\text{TRZ}}^2 [\text{SSq}] = 29.788.$$

Summary

ID	Quantity	Target	Error
S603	$R_{\oplus}$ km	6371	EXACT
S604	Core radius km	3485	EXACT
S605	Crust km	35	EXACT
S606	Ocean depth km	3.7	EXACT
S607	Oceanic Moho km	7	EXACT
S608	Mariana Trench km	11	EXACT
S609	Mt. Everest km	8.848	0.019%
S610	Kármán line km	100	EXACT
S611	Earth age Gyr	4.54	0.007%
S612	Orbital v km/s	29.78	0.026%

Highlights. Tier CC delivers **seven exact closures** across Earth structure and motion. Earth radius factors cleanly as $A_5\text{SO5}^2 + A_5D_{\text{BSFG}} + \text{SO5} + F_{\text{TRZ}}\text{SO5} = 6371$. Core radius emerges from $A_5\text{SO5}D_{\text{BSFG}} - \text{SO5}^2 - D_{\text{BSFG}} - N_{\text{ch}} = 3485$. Earth’s age at 4.5403 Gyr matches the 4.54 Gyr canonical value to 0.007%, the highest-precision non-exact closure of the tier. Cumulative: 317 closures; 87 lockings.
