

PAPER_1338 — Non-Abelian Anyons (Fibonacci, Ising)

Framework: UQFF — Star-Magic v5.27+ | **Tier:** E Quantum Extremes (CLOSED) **Calculator:** `calculate_paradox({"paradox": "non_abelian_anyons"})`

Master Expression

Fibonacci dim = ϕ = 1.618 golden ratio; Ising dim = $\sqrt{2}$

Match: STRUCTURAL

Interpretation

SO(26) Clifford braid group supports non-abelian fusion.

NOT REPLACEMENT — UQFF integer-primitive identity. Zero fit parameters.
