

PAPER_1339 — Topological Quantum Computation Feasibility

Framework: UQFF — Star-Magic v5.27+ | **Tier:** E Quantum Extremes (CLOSED) **Calculator:** `calculate_paradox({"paradox": "top_quantum_computation"})`

Master Expression

Gate complexity $\leq D_{\text{crit}} = 26$ braid operations

Match: STRUCTURAL

Interpretation

Fault-tolerant via topological protection of anyons.

NOT REPLACEMENT — UQFF integer-primitive identity. Zero fit parameters.
