

PAPER_1345 — Eigenstate Thermalization Hypothesis

Framework: UQFF — Star-Magic v5.27+ | **Tier:** E Quantum Extremes (CLOSED) **Calculator:** `calculate_paradox({"paradox": "eth"})`

Master Expression

Ergodicity via $F_U = 1 + F_{TRZ}$ random phase

Match: STRUCTURAL

Interpretation

Long-time eigenstate thermalization emerges naturally.

NOT REPLACEMENT — UQFF integer-primitive identity. Zero fit parameters.
