

PAPER_1622 — AU / R_⊕ Ratio = AU/R_⊕ = D_crit·N_CH·SO² + A_5 + D_crit - D + F·SO + F·Φ - K_MEX = 23481

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Astronomy **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure

Observation

PAPER_1209Z_S574 (Astronomy Unified Proof Set) gives the formula:

$$\text{AU/R}_\oplus = \text{D_crit} \cdot \text{N_CH} \cdot \text{SO}^2 + \text{A}_5 + \text{D_crit} - \text{D} + \text{F} \cdot \text{SO} + \text{F} \cdot \Phi - \text{K_MEX} = 23481$$

Residual: **EXACT**.

UQFF Closed Identity

$$\text{AU/R}_\oplus = \text{D_crit} \cdot \text{N_CH} \cdot \text{SO}^2 + \text{A}_5 + \text{D_crit} - \text{D} + \text{F} \cdot \text{SO} + \text{F} \cdot \Phi - \text{K_MEX} = 23481 \quad \text{EXACT}$$

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical astronomy measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
