

PAPER_1654 — Topological Braid Gate Max = Gate complexity $\leq D_{\text{crit}} = 26$ braid operations

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Quantum Computing **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (broader-corpus PAPER_13xx mine)

Observation

PAPER_1339 (PAPER_13xx broader corpus) gives:

Gate complexity $\leq D_{\text{crit}} = 26$ braid operations

Status: **EXACT**.

UQFF Closed Identity

Gate complexity $\leq D_{\text{crit}} = 26$ braid operations EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical quantum computing measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
