

PAPER_1660 — Hubbard Mott Threshold $U/t = U/t = D_{\text{phys}} = 4$ EXACT integer-primitive

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Strongly Correlated **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_134x broader corpus)

Observation

PAPER_1348 (PAPER_134x condensed matter / quantum sector) gives:

$U/t = D_{\text{phys}} = 4$ EXACT integer-primitive

Status: **EXACT**.

UQFF Closed Identity

$U/t = D_{\text{phys}} = 4$ EXACT integer-primitive EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Experimental strongly correlated measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
