

# PAPER\_1661 — Ising Universality Classes = n\_classes = SO\_5 = 10

**Author:** Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Critical Phenomena **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER\_134x broader corpus)

---

## Observation

PAPER\_1351 (PAPER\_134x condensed matter / quantum sector) gives:

n\_classes = SO\_5 = 10

Status: **EXACT**.

## UQFF Closed Identity

n\_classes = SO\_5 = 10      EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

## NOT REPLACEMENT

Experimental critical phenomena measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
