

PAPER_1685 — Electroweak Vacuum Decay Rate = Γ_{decay} = 0 by $F_U=1$ construction (no universe-ending decay)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Standard Model **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_145x-147x broader corpus)

Observation

PAPER_1469 (PAPER_14xx broader corpus, classic cosmology/BSM puzzle) gives:

$\Gamma_{\text{decay}} = 0$ by $F_U=1$ construction (no universe-ending decay)

Status: **EXACT**.

UQFF Closed Identity

$\Gamma_{\text{decay}} = 0$ by $F_U=1$ construction (no universe-ending decay) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical standard model measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
