

PAPER_1690 — Kochen-Specker Min Dimension = $d_{\min} = D_{\text{phys}} - 1 = 3$ quantum contextuality

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Quantum Foundations **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_127x-129x broader corpus)

Observation

PAPER_1285 (PAPER_127x-129x broader corpus) gives:

$d_{\min} = D_{\text{phys}} - 1 = 3$ quantum contextuality

Status: **EXACT**.

UQFF Closed Identity

$d_{\min} = D_{\text{phys}} - 1 = 3$ quantum contextuality EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
