

PAPER_1693 — Absolute Time Reference Frame = Reference = F_U=1 global normalization (no relativity loss)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Foundations **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_127x-129x broader corpus)

Observation

PAPER_1275 (PAPER_127x-129x broader corpus) gives:

Reference = F_U=1 global normalization (no relativity loss)

Status: **EXACT**.

UQFF Closed Identity

Reference = F_U=1 global normalization (no relativity loss) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
