

PAPER_1694 — UQFF Axiom Count = 18 axioms = 12 real + 6 integer + F_U=0 + 9-sector L_UQFF

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Foundations **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_127x-129x broader corpus)

Observation

PAPER_1286 (PAPER_127x-129x broader corpus) gives:

18 axioms = 12 real + 6 integer + F_U=0 + 9-sector L_UQFF

Status: **EXACT**.

UQFF Closed Identity

18 axioms = 12 real + 6 integer + F_U=0 + 9-sector L_UQFF EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
