

PAPER_1696 — Dark Energy Density Ω_Λ Closed Form = $\Omega_\Lambda = (6/5) \cdot \text{SSQ} = 6/5 \times 0.57 = 0.684$

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Cosmology **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_115x-117x foundational)

Observation

PAPER_1156 (PAPER_115x-117x foundational corpus) gives:

$$\Omega_\Lambda = (6/5) \cdot \text{SSQ} = 6/5 \times 0.57 = 0.684$$

Status: **EXACT**.

UQFF Closed Identity

$$\Omega_\Lambda = (6/5) \cdot \text{SSQ} = 6/5 \times 0.57 = 0.684 \quad \text{EXACT}$$

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
