

PAPER_1704 — SSQ via $\Omega_\Lambda \times 5/6$ reciprocal = SSQ = $\Omega_\Lambda \times 5/6 = 0.684 \times 5/6 = 0.57$ (reciprocal closure)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Cosmology **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_115x-117x foundational)

Observation

PAPER_1159 (PAPER_115x-117x foundational corpus) gives:

$$\text{SSQ} = \Omega_\Lambda \times 5/6 = 0.684 \times 5/6 = 0.57 \text{ (reciprocal closure)}$$

Status: **EXACT**.

UQFF Closed Identity

$$\text{SSQ} = \Omega_\Lambda \times 5/6 = 0.684 \times 5/6 = 0.57 \text{ (reciprocal closure)} \quad \text{EXACT}$$

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
