

PAPER_1719 — Atiyah-Singer Dirac Index 26D = Dirac index = $D_{\text{crit}} - D_{\text{phys}} = 22$ EXACT (residual compact dims)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Math/Geometry **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_122x-123x foundational Millennium-adjacent)

Observation

PAPER_1231 (PAPER_122x-123x broader corpus) gives:

Dirac index = $D_{\text{crit}} - D_{\text{phys}} = 22$ EXACT (residual compact dims)

Status: **EXACT**.

UQFF Closed Identity

Dirac index = $D_{\text{crit}} - D_{\text{phys}} = 22$ EXACT (residual compact dims) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
