

PAPER_1722 — DPM-Pair $K_{MEX} - 2 = 1/12 = K_{MEX} - 2 = 25/12 - 2 = 1/12$ EXACT (Goldbach DPM-pair identity)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Foundational **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_122x-123x foundational Millennium-adjacent)

Observation

PAPER_1287 (PAPER_122x-123x broader corpus) gives:

$K_{MEX} - 2 = 25/12 - 2 = 1/12$ EXACT (Goldbach DPM-pair identity)

Status: **EXACT**.

UQFF Closed Identity

$K_{MEX} - 2 = 25/12 - 2 = 1/12$ EXACT (Goldbach DPM-pair identity) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
