

PAPER_1724 — UA Canonical Ledger Anchor = UA = 0.4816 canonical (anchors $\wedge$ ledger normalization)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Foundational **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_122x-123x foundational Millennium-adjacent)

Observation

PAPER_1232 (PAPER_122x-123x broader corpus) gives:

UA = 0.4816 canonical (anchors $\wedge$ ledger normalization)

Status: **EXACT**.

UQFF Closed Identity

UA = 0.4816 canonical (anchors $\wedge$ ledger normalization) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
