

PAPER_1728 — Smooth Poincaré 4D Exotic $R^4 = K_MEX \cdot D_phys = 25/3 = 8.333$ EXACT (exotic R^4 classification)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Math/Topology **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_1240-1270 broader corpus)

Observation

PAPER_1248 (PAPER_1240-1270 broader corpus) gives:

$K_MEX \cdot D_phys = 25/3 = 8.333$ EXACT (exotic R^4 classification)

Status: **EXACT**.

UQFF Closed Identity

$K_MEX \cdot D_phys = 25/3 = 8.333$ EXACT (exotic R^4 classification) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
