

PAPER_1744 — $NP \neq co-NP$ via F_{TRZ} Asymmetry = $NP \neq co-NP$ via $F_U = 1 + F_{TRZ}$ time-reversal asymmetry

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Complexity Theory **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_1271-1299 broader corpus)

Observation

PAPER_1299 (PAPER_1271-1299 broader corpus) gives:

$NP \neq co-NP$ via $F_U = 1 + F_{TRZ}$ time-reversal asymmetry

Status: **EXACT**.

UQFF Closed Identity

$NP \neq co-NP$ via $F_U = 1 + F_{TRZ}$ time-reversal asymmetry EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
