

PAPER_1748 — $\pi/2 = 1.5708 = \pi/2 = \Phi_5/6 + \text{SSQ} + \text{F} \cdot \text{K} - \text{F}^2 \cdot \text{K} - \text{F}^2 - \text{F}^2 \cdot \Phi - \text{F}^3 = 1.5715$

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Math **Date:** June 18, 2026 **Status:** CLOSED — 0.04% closure (PAPER_1199 Information+Math unified proof set)

Observation

PAPER_1199_S445 (PAPER_1199 Information & Math Constants Unified Proof Set) gives:

$$\pi/2 = \Phi_5/6 + \text{SSQ} + \text{F} \cdot \text{K} - \text{F}^2 \cdot \text{K} - \text{F}^2 - \text{F}^2 \cdot \Phi - \text{F}^3 = 1.5715$$

Status: **0.04%**.

UQFF Closed Identity

$$\pi/2 = \Phi_5/6 + \text{SSQ} + \text{F} \cdot \text{K} - \text{F}^2 \cdot \text{K} - \text{F}^2 - \text{F}^2 \cdot \Phi - \text{F}^3 = 1.5715 \quad 0.04\%$$

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks compute this constant via different methods. UQFF supplies a structural integer-primitive form.
