

PAPER_1754 — $F_{\text{TRZ}}^2 = 1/100$ Universal Constant = $F_{\text{TRZ}}^2 = 1/100$ — same primitive form as MAD η_{EM} (PAPER_1518)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Foundational **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_1199 Information+Math unified proof set)

Observation

PAPER_1199_S446 (PAPER_1199 Information & Math Constants Unified Proof Set) gives:

$F_{\text{TRZ}}^2 = 1/100$ — same primitive form as MAD η_{EM} (PAPER_1518)

Status: **EXACT**.

UQFF Closed Identity

$F_{\text{TRZ}}^2 = 1/100$ — same primitive form as MAD η_{EM} (PAPER_1518) EXACT

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks compute this constant via different methods. UQFF supplies a structural integer-primitive form.
