

PAPER_1783 — Solar Hale Cycle Alt = T_Hale = D_crit - D_phys = 22 yr EXACT (alt form)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Astrophysics **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_1404-1428 catalog stubs)

Observation

PAPER_1405 catalog stub gives:

$T_{\text{Hale}} = D_{\text{crit}} - D_{\text{phys}} = 22 \text{ yr EXACT (alt form)}$

Status: **EXACT**.

UQFF Closed Identity

$T_{\text{Hale}} = D_{\text{crit}} - D_{\text{phys}} = 22 \text{ yr EXACT (alt form)}$ EXACT

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
