

PAPER_1785 — Lepton CP Phase δ_{CP} Alt = $\delta_{CP} = -\pi/2$ EXACT (alt form, via maximal F_TRZ phase lock)

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Neutrino Physics **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_1404-1428 catalog stubs)

Observation

PAPER_1411 catalog stub gives:

$\delta_{CP} = -\pi/2$ EXACT (alt form, via maximal F_TRZ phase lock)

Status: **EXACT**.

UQFF Closed Identity

$\delta_{CP} = -\pi/2$ EXACT (alt form, via maximal F_TRZ phase lock) EXACT

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
