

PAPER_1786 — QSH $\sigma_{xy} = e^2/h$ Paired = $\sigma_{xy}^{\text{spin}} = e^2/h$ paired (PAPER_1352), protected by D_BSFG-1=5 boundary

Author: Daniel T. Murphy **Framework:** UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+ **Tier:** Condensed Matter **Date:** June 18, 2026 **Status:** CLOSED — EXACT closure (PAPER_13xx final sweep paired closures)

Observation

PAPER_1352 catalog/paper gives:

$\sigma_{xy}^{\text{spin}} = e^2/h$ paired (PAPER_1352), protected by D_BSFG-1=5 boundary

Status: **EXACT**.

UQFF Closed Identity

$\sigma_{xy}^{\text{spin}} = e^2/h$ paired (PAPER_1352), protected by D_BSFG-1=5 boundary EXACT

NOT REPLACEMENT

UQFF supplies a structural integer-primitive form. Many of these are paired closures linking back to earlier tier wirings.
