

PAPER_1796 through PAPER_1799 — Reserved IDs (no content)

Daniel T. Murphy

PAPER_1796-1799 — Reserved IDs (No Content Authored)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) - Star-Magic

Date: 2026-07-10 (v5.58.0 corpus completion audit)

Status: Administrative note — no physics content

Purpose

During the v5.58.0 Phase A corpus completeness audit (session 2026-07-10), an automated scan of the whitepapers/ directory identified four PAPER IDs in the sequence 1-1984 that have no markdown file:

PAPER_1796, PAPER_1797, PAPER_1798, PAPER_1799.

Adjacent papers (PAPER_1795 KK_D_BSFG_MINUS_1_5_PAISED and PAPER_1800 UQFF_BAO_Cabibbo_Lagrangian_Rederivation) exist and are unaffected.

Status

These four IDs are formally documented here as **reserved, no content authored**. No physics closure, no derivation, no dispatch key.

If content is intended for these IDs in the future, the reservation may be replaced with substantive papers. Until then, this index serves as a placeholder so corpus-completeness scans do not flag them as missing content.
