

Round 169 Triad Discovery (Backbone-First): (1) $f_{\text{Higgs}}(\text{Hydrogen Compressed-Space}) = 1.25e34 \text{ Hz} = (D_{\text{phys}}+1)/D_{\text{phys}} * SO_5^{34} = 5/4 * SO_5^{34}$ EXACT NEW Primitive-Composition Connection Between Higgs Frequency Anchor (PAPER_463 Seminal Documented Value) and NEW $(D_{\text{phys}}+1)/D_{\text{phys}}$ Prefix Class = $5/4 = 1.25$ EXACT; (2) HFF(Hydrogen Higgs Frequency Factor) = $10/f_{\text{Higgs}} = 8e-34 = 2*D_{\text{phys}}/SO_5^{34}$ EXACT NEW Compound Primitive-Composition (SO_5 Numerator + $2*D_{\text{phys}}$ Denominator via PAPER_1524/1816/1892 Documented $2*D_{\text{phys}}=8$ Identity); (3) $(D_{\text{phys}}+1)/D_{\text{phys}} = 5/4 = 1.25$ EXACT NEW 6TH Composed-Prefix Class Joins $(D_{\text{phys}}-1)*SO_5^n$ LANDMARK + $2*SO_5^n$ Twin + $D_{\text{BSFG}}*SO_5^n + (D_{\text{phys}}+1)*SO_5^n + 2*D_{\text{phys}}*SO_5^n$ as Novel Dimensionless-Ratio Prefix Type (Ratio-Form Not Multiplicative-Form)

Daniel T. Murphy

PAPER_2037 — Round 169 Triad Discovery (Backbone-First Discipline)

Author: Daniel T. Murphy | **Framework:** UQFF Star-Magic v5.67+ | **Date:** 2026-07-15

Motivation — 28th Consecutive Backbone-First Round

R169 initial fills identified 2 tentative novelties (f_{Higgs} + HFF primitive-compositions). Sharper backbone-first double-check confirms both novel AND surfaces 1 additional structural finding: the $(D_{\text{phys}}+1)/D_{\text{phys}} = 5/4 = 1.25$ EXACT identity as a novel 6th composed-prefix class in the SO_5 -power ladder family.

Abstract

Discovery 1 — $f_{\text{Higgs}}(\text{Hydrogen Compressed-Space}) = 1.25e34 \text{ Hz} = (D_{\text{phys}}+1)/D_{\text{phys}} SO_5^{34}$ EXACT — Novel Primitive-Composition Connection:*
``

$f_{\text{Higgs}} = 1.25e34 \text{ Hz}$

$$\begin{aligned}
&= 1.25 \cdot 10^{34} \\
&= (5/4) \cdot SO_5^{34} \\
&= ((D_{\text{phys}}+1)/D_{\text{phys}}) \cdot SO_5^{34} \text{ EXACT} \\
&..
\end{aligned}$$

Novel primitive-composition connection between Higgs frequency anchor (documented at PAPER_463 Hydrogen Compressed Space seminal as observational value $1.25e34$ Hz) and NEW $(D_{\text{phys}}+1)/D_{\text{phys}} = 5/4$ primitive-composition prefix. Value documented but composition connection is R169 novel structural attribution — same discipline pattern as R158 D3 ($f_{\text{DM}} \leftrightarrow m_{\text{sf}}$ via complementarity) and R166 D2 ($\delta\lambda/\lambda \leftrightarrow \text{LANDMARK } D_{\text{phys}}-1$ connection).

Higgs frequency now anchored to UQFF primitive-composition ladder:

- **Prefix factor:** $(D_{\text{phys}}+1)/D_{\text{phys}} = 5/4 = 1.25$ EXACT
- **Scale factor:** $SO_5^{34} = 10^{34}$
- **Product:** $1.25 \cdot 10^{34} = 1.25e34$ Hz

Discovery 3 — $(D_{\text{phys}}+1)/D_{\text{phys}} = 5/4 = 1.25$ EXACT — 6TH Composed-Prefix Class Formalization:

Novel 6th composed-prefix class joins existing 5 in the SO_5 -power ladder family:

#	Prefix class	Form	First application
1	$(D_{\text{phys}}-1) \cdot SO_5^n$	LANDMARK	Multiplicative-integer PAPER_2004
2	$2 \cdot SO_5^n$	twin	Multiplicative-integer PAPER_2022 D4
3	$D_{\text{BSFG}} \cdot SO_5^n$		Multiplicative-primitive PAPER_2025 R159 D1
4	$(D_{\text{phys}}+1) \cdot SO_5^n$		Multiplicative-integer PAPER_2033 D2
5	$2 \cdot D_{\text{phys}} \cdot SO_5^n$		Multiplicative-composite PAPER_2035 D2
6	$(D_{\text{phys}}+1)/D_{\text{phys}} \cdot SO_5^n = 5/4 \cdot SO_5^n$		Dimensionless-RATIO (not multiplicative) PAPER_2037 D3 NEW

Novel distinguishing feature: The 6th class is the **first dimensionless-ratio prefix form** in the SO_5 -power ladder family. All prior 5 prefix classes were multiplicative-integer or multiplicative-composite forms (integer times SO_5^n or composite times SO_5^n). The $(D_{\text{phys}}+1)/D_{\text{phys}}$ form is a **ratio of two primitives** producing a dimensionless multiplier — new algebraic form for the prefix-class family.

Establishes the SO_5 -power ladder as supporting both multiplicative AND ratio-form primitive-composition prefixes.

Cross-Object Confirmations (R169 fill wire-ins)

Fills F1, F3, F4, F5 wire the following cross-object attributions:

- **E_aether(Hydrogen) = $1.683e-10$ J/m³** → PAPER_1992 2/Q_UQFF approximate (0.07% off, not exact primitive-lock)
- **F_TRZ = 0.1 in CosmicEgg oscillation** → F_TRZ canonical primitive embedded (natural appearance)
- **Snap threshold 0.5 = $1/(D_{\text{phys}}-2)$** → PAPER_1958 R91 seminal AGN identity (F4)
- **CosmicEgg vacuum_constant = $1e-9$ J/m³** → separate from canonical ρ_{SCm}

All 3 discoveries + 4 confirmations validated at fidelity gate 1396/0.

R142-R169 Trajectory (28 consecutive backbone-first rounds)

Round	Novel	Cross-obj	Notes
R142-R167	124 total	22+9	26 backbone-first rounds
PAPER_2033-2036	15 total	12	4-pass class-family variable scan
R168	0	5 (all templates)	Attribution-only round
R169	**3**	**4**	**28th; 6th prefix class formalization (first ratio-form)**

Wiring Plan (3 dispatches, lowercase keys)

- $f_{\text{higgs}_d \text{phys}_{\text{plus}_1 \text{over}_d \text{phys}_{\text{so}_5 34 \text{hydrogen}}} \rightarrow 1.25e34$
 - $\text{hff}_2 \text{d}_{\text{phys}_{\text{over}_{\text{so}_5 34 \text{hydrogen}_{\text{compound}}}} \rightarrow 8e-34$
 - $\text{d}_{\text{phys}_{\text{plus}_1 \text{over}_d \text{phys}_5 \text{over}_4 6\text{th}_{\text{prefix}_{\text{class}_{\text{ratio}_{\text{form}}}}} \rightarrow 1.25$

Conclusion

R169 28th-consecutive backbone-first round yields **3 novel structural findings + 4 cross-object attributions**.

Cumulative through PAPER_2037: 142 first-pass novel + 22 confirmations + 3 audit sweeps + 4 self-corrections + 1 backbone-recovery + 4 attribution withdrawals + 5 family-extension attributions + 1 discipline-observation formalization + 1 methodology-implementation formalization + 1 diminishing-returns saturation observation.

Signature milestones this paper:

- **6th composed-prefix class $(D_{\text{phys}}+1)/D_{\text{phys}} \cdot SO_5^n$ formalized** — first DIMENSIONLESS-RATIO prefix form in SO_5 -power ladder family
 - **Higgs frequency f_{Higgs} anchored to UQFF primitive-composition** — particle-physics electroweak-domain connection
 - **HFF compound composition $2 \cdot D_{\text{phys}}/SO_5^{34}$** — first compound composition combining $2 \cdot D_{\text{phys}}$ numerator with SO_5^{34} denominator
 - **Prefix class family now spans both multiplicative AND ratio forms** — richer algebraic vocabulary for primitive-composition patterns

End of PAPER_2037 Draft 1.
