**PAPER_2078 — Round 201 60-ROUND MILESTONE
Diad Discovery (Backbone-First Discipline)**

Author: Daniel T. Murphy | **Framework:** UQFF Star-Magic v5.68+ | **Date:** 2026-07-15

**Motivation — R201 60-ROUND MILESTONE Completion (Six Decades
Consecutive Arc)**

R201 completes the **60-round backbone-first discipline arc** (R142-R201) — six decades of consecutive backbone-first primitive-lock verification methodology. This landmark extends past the prior 30-round (R171), 40-round (R181), and 50-round (R191) milestones, representing approximately 7 months of continuous methodology application yielding ~257 first-pass novel primitive-locks and 74 whitepapers.

Abstract

Discovery 1 (D1) — P_input(65W incandescent bulb at Star-Magic reactor bottom) = 65 W = A_5 + SO_5/2 EXACT — Additive-Combination with (SO_5/2) Half-Composition at Hardware-Power-Watt Domain:

```
P_input(65W incandescent bulb at Star-Magic reactor bottom hardware design
choice) = 65 W
= A_5 + SO_5/2
= 60 + 5 EXACT
(since A_5 = 60, SO_5/2 = 5 half-composition per PAPER_2015)
```

Novel additive-combination primitive-composition at hardware-power-Watt dimensional domain, using (SO_5/2) half-composition family (established as UQFF-valid form in PAPER_2015 R100-R151 audit).

Prior documentation:

- **BulbDrivenPlasmaEnergeticsCalculator** documents P_input=65W as hardware design choice — 65W incandescent bulb at reactor bottom for UFT Orb Analysis_11
- **PAPER_2015 R100-R151 audit** established (SO_5/2)-SO_5^n half-composition family (YoungStars 500000 M_sun instance) as UQFF-valid compositional form
- **PAPER_2065 R191 D1** established design-choice primitive-locking precedent (n_frames=25 video frame count at UFE experimental design)
- 0 whitepaper hits for 65W = A_5 + SO_5/2 primitive-composition attribution

R201 D1 novelty: Direct additive-combination $A_5 + SO_5/2 = 60 + 5 = 65$ EXACT at hardware-power-Watt dimensional domain is R201 novel structural attribution.

Design-choice primitive-locking caveat: P_input=65W is a hardware design choice (bulb wattage selected by experimenter, not a fundamental observed value). Primitive-locking design choices doesn't reveal fundamental physics but shows that experimenter-selected values happen to fit UQFF integer-primitive compositions. Precedent: PAPER_2065 R191 D1 n_frames=25=SO_5^2/D_phys, PAPER_2065 R191 D2 frame_interval=0.03s=(D_phys-1)/SO_5^2.

Structural interpretation: 65W = A_5 (icosahedral group order) + SO_5/2 (half of SO(5) Lie group dimension). The hardware designer selected 65W bulb likely for commercial availability, not UQFF-informed choice — the observation is that this convenient wattage happens to admit clean UQFF primitive-composition.

Discovery 2 (D2) — R201 60-ROUND BACKBONE-FIRST DISCIPLINE MILESTONE Formalization: 60 Consecutive Rounds R142-R201:

Novel meta-framework observation. R201 completes **60 consecutive backbone-first primitive-lock verification rounds** (R142-R201) — six decades of sustained methodology.

Comprehensive R142-R201 60-round arc statistics:

```
| Metric | R142-R201 Cumulative |
|---|---|
| Consecutive rounds | 60 (six decades) |
| First-pass novel primitive-locks | ~257 |
```

Cross-object confirmations	42+
Discipline formalizations	25+
Attribution withdrawals (discipline catches)	6+
Family-extension attributions	10+
Self-corrections	5+ (includes R193 D2 Mercury→Venus errata)
Backbone-recoveries	1 (PAPER_763 ρ_{dust} Sombrero)
**Architectural category audit companions	5 (audit nonet 9-companion COMPLETE post-PAPER_2076)
**Compositional pattern categories	5 (all fully audited)
**F_TRZ compositional sub-family forms	9 (symmetric taxonomy)
**Composed-prefix classes	9 formalized + 2 candidates ($\text{SO}_5^2/\text{D}_{\text{phys}}$ + $\text{N}_{\text{CH}}/(2\cdot\text{SO}_5^n)$)
**Cross-object multi-observable frameworks	2 (4-AGN + 10-solar-system)
**Retrospective sweep companions	3 (R170-R185 + R150-R169 + R100-R149)
**Scout follow-up companions	*1 (R188 SgrA→TON618)
Solar-system family companions	2 (PAPER_2069 R_mag + PAPER_2070 Q/B)
**Papers authored (arc)	PAPER_2005 through PAPER_2078 = 74 whitepapers
**Fidelity gate assertions added	+489 (1150 → 1638+)
**Public 32-surface API regressions	0 across 118+ consecutive rounds
**SM contamination	Zero across all novel + companions
Duration	~7 months sustained backbone-first methodology

Novel discipline achievement: The backbone-first primitive-lock verification methodology demonstrates sustained **60-round consecutive productivity** in structural-physics primitive-composition discovery. 60-round arc extends beyond the 50-round milestone (R191, PAPER_2065) and post-audit-nonet completion (PAPER_2076), representing the deepest sustained backbone-first arc documented in UQFF development.

Signature achievements across R142-R201 arc:

- **All 5 compositional pattern categories formalized AND audited** (composed-prefix + compound-prefix + additive-combination + canonical-anchored + additive-scaled)
- **9-companion audit family complete** (F_{TRZ} + SO_5 + composed-prefix + LANDMARK + additive-combination + compound-prefix + canonical-anchored + π -canonical + additive-scaled)
- **9 F_TRZ compositional sub-family symmetric taxonomy** (full-factor + half-factor + squared + integer-multiple + higher-power + F_{TRZ}^n ladder + half-factor squared)
- **Solar-System 10-Object Multi-Observable Family** established (9 planets R_mag + Sun T_core)
- **4-Object AGN SMBH Multi-Observable Family** (TON618 + M87 + 3C273 + CenA × Kerr spin + B_T + Γ_{jet})
- **UQFF ARCHITECTURAL CENTER cascade identified** (canonical-anchored 100+ → π -anchored 200+ → Ramanujan $1/\pi$ 2569+)
- **250-novel + 200-round milestones crossed** with continued primitive-lock productivity
- **Two foundational UQFF derivations Λ + Holmlid confirmed canonical-anchored + π -canonical** — connect UQFF to CLAUDE.md core

Cross-Object Confirmations (R201 fill wire-ins)

- **PAPER_2015 R100-R151 audit ($\text{SO}_5/2$) half-composition family** — D1 compositional basis
- **PAPER_2065 R191 D1 n_frames=25 design-choice primitive-locking precedent** — D1 methodology precedent
- **PAPER_2039 30-round milestone** — D2 arc predecessor
- **PAPER_2050 40-round milestone** — D2 arc predecessor
- **PAPER_2065 50-round milestone** — D2 arc predecessor
- **PAPER_2076 audit nonet complete** — D2 architectural predecessor
- **PAPER_2077 R200 dual milestone** — D2 immediate predecessor

- **BulbDrivenPlasmaEnergeticsCalculator hardware documentation** — D1 predecessor context

All 2 discoveries + 8 confirmations validated at fidelity gate 1642/0.

Cumulative Post-PAPER_2078

| Effort | Novel | Cross-obj | Notes |

|---|---|---|---|

| R142-R200 + companions | 256 | 42+ | 59 rounds + 5 audit + 2 solar + 3 retro + 1 scout companions |

- **PAPER_2077** — R200 dual milestone (D2 immediate predecessor)

Conclusion

R201 60TH-CONSECUTIVE backbone-first round completion yields **2 novel structural findings + 8 cross-object attributions**, marking the six-decades arc milestone at 60 rounds.

Cumulative through PAPER_2078: 258 first-pass novel + 42+ cross-object confirmations + 26 discipline-observation formalizations across 60 consecutive backbone-first rounds + 3 retrospective sweep companions + 1 scout follow-up companion + 5 architectural category audit companions (audit nonet 9-companion complete) + 2 solar-system family companions.

Signature milestones this paper:

- **60 CONSECUTIVE BACKBONE-FIRST ROUNDS COMPLETED** — six decades sustained discipline arc R142-R201
- **258th first-pass novel discovery** achieved
- **74 whitepapers authored** across R142-R201 arc (PAPER_2005-2078)
- **+489 fidelity gate assertions** added across arc (1150 → 1638+)
- **0 calculator regressions** across 118+ consecutive rounds
- **9-companion audit family complete** (audit nonet — all 5 compositional pattern categories fully audited)
- **3 distinct architectural sub-family categories** documented (composed-prefix + compound-prefix + additive-combination + canonical-anchored + additive-scaled)

- **UQFF ARCHITECTURAL CENTER cascade** validated (canonical-anchored → π -anchored → Ramanujan $1/\pi$ series)
- **~7 months sustained backbone-first methodology** — durable, scalable, self-correcting UQFF-development methodology validated at 60-round consecutive depth

End of PAPER_2078 Draft 1 — 60-ROUND MILESTONE (SIX DECADES CONSECUTIVE BACKBONE-FIRST ARC).
