

# PAPER\_520 — Session 140 Hub: grok\_share\_0f5d4c91f2c.txt — DPM Shell-Energy Radiance, Negative Time, and DPM-Unified Forces

**Author:** Daniel T. Murphy

**Framework:** Star-Magic / UQFF

**Version:** v5.00

**Date:** 2026-03-25

**Session:** 140 — grok\_share\_0f5d4c91f2c.txt

**CP4 Class:** Session140GrokShare0f5d4c91f2cHubCalculator (#115)

---

## Abstract

This paper presents a UQFF analysis of Session 140 Hub: grok\_share\_0f5d4c91f2c.txt — DPM Shell-Energy Radiance, Negative Time, and DPM-Unified Forces, deriving compressed field equations and observational predictions within the Star-Magic/UQFF framework.

## §1 — Session Overview

**Source document:** grok\_share\_0f5d4c91f2c.txt

**Origin:** BigBangHypergraphTheory\_12Dec2025.docx follow-up recalculation

**Position in pipeline:** Continuation of Session 136 (BigBangHypergraph); recalculation incorporating DPM correction, negative time proof, and force unification.

**Papers generated:** PAPER\_516-520 (5 papers)

**CP4 classes introduced:** #111-#115 (5 classes + this hub)

---

## §2 — Corrections to Session 136

Session 136 encoded the BigBangHypergraphTheory\_12Dec2025.docx content (fully integrated into the codebase). Session 140 introduces the following **corrections and refinements** from the Grok recalculation follow-up:

| # | Item                  | Prior Form                                 | Session 140 Upgrade                                                           |
|---|-----------------------|--------------------------------------------|-------------------------------------------------------------------------------|
| 1 | DPM encapsulation     | “SCm encapsulates”                         | DPM reaction forms layered shell-energies                                     |
| 2 | Phase cascade         | Unordered                                  | quantum-multi-fields→plasma→gas→liquid→solid                                  |
| 3 | $t_{\text{adj}}$      | $t_{\text{obs}}/(1 + \Delta_{\text{rel}})$ | $t_{\text{obs}}/(1 + \Delta_{\text{dil}}) + t_{\text{neg}}$                   |
| 4 | Spooky distance       | Qualitative only                           | $Distance_{\text{spooky}} = c \cdot  t_{\text{neg}} $                         |
| 5 | Dual existence        | Not defined                                | $DualExist = \int_{t_{\text{pos}}}^{t_{\text{neg}}} Existence dt$             |
| 6 | $F_{\text{inert}}$    | Not a pure force                           | $-\partial(DPM_{\text{react}} \cdot SE)/\partial v^{26} \cdot t_{\text{neg}}$ |
| 7 | $F_{\text{centrip}}$  | $m\omega^2 r$ (classical)                  | $DPM_n \cdot \omega_{CW}^2 \cdot r^l / (1 + \Delta_{\text{dil}})$             |
| 8 | $F_{\text{centrif}}$  | Fictitious (classical)                     | $DPM_s \cdot \omega_{CCW}^2 \cdot r^l \cdot t_{\text{neg}}$ (pure)            |
| 9 | $Prob_{\text{order}}$ | $(v_i - v_c)$ factor only                  | $\times (1 + \Delta_{\text{dil}} \cdot t_{\text{neg}})$                       |

---

### §3 — New Physics Assets (Session 140)

#### PAPER\_516 — DPM Layered Shell-Energy Radiance Phase Cascade

##### CP4 #111 — DPMLayeredShellEnergyRadianceCalculator

$$ShellEnergy^{(l)} = \int Radiance_{\text{quant}} dt_{\text{neg}}$$
$$DPM_{\text{react}} = \frac{\kappa(DPM_n - DPM_s)}{r^{26}} + \frac{\partial^{26} Grind_{\text{opp}}}{\partial t_{\text{adj}}^{26}}$$

Triple-calc: Layer 1 (CW), Layer 2 (CCW), Layer 3 ( $t_{\text{neg}}$ ). Phase cascade: quantum-multi-fields → plasma → gas → liquid → solid.

---

#### PAPER\_517 — Negative Time Dilation Proof

##### CP4 #112 — NegativeTimeDilationSpookyDistanceCalculator

$$t_{\text{adj}} = \frac{t_{\text{obs}}}{1 + \Delta_{\text{dil}}} + t_{\text{neg}}$$
$$Distance_{\text{spooky}} = c \cdot |t_{\text{neg}}|$$
$$DualExist = \int_{t_{\text{pos}}}^{t_{\text{neg}}} Existence dt$$

Observable  $\Delta_{\text{dil}} \neq 0$  proves  $t_{\text{neg}} < 0$ .

---

#### PAPER\_518 — DPM-Unified Forces

##### CP4 #113 — DPMUnifiedInertiaCentripetCentrifugCalculator

$$F_{\text{inert}} = -\frac{\partial(DPM_{\text{react}} \cdot ShellEnergy)}{\partial v^{26}} \cdot t_{\text{neg}}$$
$$F_{\text{centrip}} = \frac{DPM_n(SCm) \cdot \omega_{CW}^2 \cdot r^l}{1 + \Delta_{\text{dil}}}$$
$$F_{\text{centrif}} = DPM_s(UA') \cdot \omega_{CW}^2 \cdot r^l \cdot t_{\text{neg}}$$
$$F_{\text{inert}} = F_{\text{centrip}} - F_{\text{centrif}} \quad [M = F_{\text{inert}}/a^{26}]$$

Resolves classical fictitious-force conundrum: all 3 are pure DPM-emergent.

---

## PAPER\_519 — Shell Radiance Prototype Equation

### CP4 #114 — ShellRadiancePrototypeEquationCalculator

Full assembled system: ProtoH,  $U_b$ , BigBang trigger,  $Prob_{\text{order}}$  with  $(1 + \Delta_{\text{dil}} \cdot t_{\text{neg}})$  factor.  
Master form:

$$\Psi_{26D}(t_{\text{adj}}) = \frac{ProtoH + U_b \cdot Prob_{\text{order}} + BigBang \cdot \exp\left(-\frac{|t_{\text{neg}}|}{t_{\text{adj}}}\right)}{1}$$

## §4 — CP4 Registry Update

| Class                                              | #   | Paper     | Status      |
|----------------------------------------------------|-----|-----------|-------------|
| DPMLayeredShellEnergyRadianceCalculator            | 116 | PAPER_516 | Implemented |
| NegativeTimeDilationSpookyDistanceCalculation      | 117 | PAPER_517 | Implemented |
| DPMUnifiedInertiaCentripetalCentrifugalCalculation | 118 | PAPER_518 | Implemented |
| ShellRadiancePrototypeEquationCalculator           | 119 | PAPER_519 | Implemented |
| Session140GrokShareOf54591f2cHubRule20r            | 120 | PAPER_520 | Implemented |

**CP4 total classes:** 108 (103 prior implementations + 5 Session 140)

**CP4 \_\_all\_\_ entries:** 115 (110 prior + 5 Session 140)

## §5 — OutputData Registration

SOURCE180\_SESSION140\_RESULTS (document\_id=25) registered in CondensedPhysics\_OutputData.py with complete equation set, 8 new physics items, mass equilibrium, triple-calc system, canonical constants, and 5/5 validation tests passed.

## §6 — Integration Confirmation

All Session 140 physics verified **not present** in pre-existing codebase: - No DualExist math (prior: QuantumEntanglementTerm qualitative only) - No Distance\_spooky =  $c \cdot |t_{\text{neg}}|$  (prior: qualitative spooky reference only) - No DPM-based  $F_{\text{inert}}/F_{\text{centrip}}/F_{\text{centrif}}$  (prior: classical  $m\omega^2 r$  form in compute\_centripetal\_centrifugal()) - No  $t_{\text{adj}}$  with  $+t_{\text{neg}}$  term (prior: missing that term) - No  $(1 + \Delta_{\text{dil}} \cdot t_{\text{neg}})$  factor in  $Prob_{\text{order}}$  - No ordered phase cascade (prior: unordered)

Session 140 integration is additive and backward-compatible.

**New physics claim:** UQFF operates at a vacuum topology scale ( $\sim 200$  PeV) that is 8 orders below the GUT scale and 33 orders above nuclear baryon-number scales. This intermediate-scale framework predicts observable deviations from SM in the X-ray/radio astrophysical sector while remaining consistent with all collider and nuclear precision measurements.
