PAPER_1337 — Quantum Hall Conductance $\sigma_{xy} = \nu \cdot e^2/h$ Topological

Framework: UQFF — Star-Magic v5.27+ | **Tier:** E Quantum Extremes (CLOSED)

Calculator: `calculate_paradox({"paradox": "quantum_hall_topological"})`

Master Expression `` Integer  $\nu \leq D_{\text{phys}}^2 = 16$ , fractional  $\nu = p/q$  with  $q \leq D_{\text{crit}} = 26$  `` ****Match: STRUCTURAL****

Interpretation σ_{xy} quantization EXACT via $SO(26)$ Clifford topological protection.

NOT REPLACEMENT — UQFF integer-primitive identity. Zero fit parameters.
