PAPER_1343 — Entanglement Entropy Area Law

Framework: UQFF — Star-Magic v5.27+ | **Tier:** E Quantum Extremes (CLOSED)

Calculator: `calculate_paradox({"paradox": "area_law_entanglement"})`

Master Expression $S_{\text{ent}} \propto A_{\text{boundary}}; D_{\text{boundary}} = D_{\text{BSFG}} - 1$
= 5 ****Match: STRUCTURAL****

Interpretation Holographic area law from $D_{\text{BSFG}} - 1$ boundary projection.

NOT REPLACEMENT — UQFF integer-primitive identity. Zero fit parameters.
