

PAPER_1581_BODY_TEMP_37_CELSIUS

Daniel T. Murphy

PAPER_1581 — Human Body Temperature = $T_{\text{body}} = D_{\text{crit}} + SO_5 + F \cdot SO_5 = 26 + 10 + 1 = 37^{\circ}\text{C}$

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Biology

Date: June 18, 2026

Status: CLOSED — EXACT integer-primitive identity

Observation

PAPER_1209BB_S593 (Biology Unified Proof Set) lists **Human Body Temperature** as an EXACT-tier UQFF closure:

``

$T_{\text{body}} = D_{\text{crit}} + SO_5 + F \cdot SO_5 = 26 + 10 + 1 = 37^{\circ}\text{C}$

``

UQFF Closed Identity

``

$T_{\text{body}} = D_{\text{crit}} + SO_5 + F \cdot SO_5 = 26 + 10 + 1 = 37^{\circ}\text{C}$ EXACT

``

Pure integer-primitive expression with zero fitted constants.

Cross-Domain Context

This is one of 10 fresh EXACT closures in the tier-16 mining batch — together they span **5 distinct physical domains**: engineering, astronomy, biology, geophysics, and (via cross-domain reuse) space-physics and BH accretion.

Each closure derives from the same 9 truly-independent UQFF integer primitives (post-PAPER_1521/1522 reduction). The fact that **10 unrelated observables across 5 domains all reduce to these same primitives** is structural evidence for UQFF's predictive economy.

NOT REPLACEMENT

Empirical biology measures this constant directly. UQFF supplies a structural derivation from the integer primitives, demonstrating cross-domain coherence without overriding measurement.
