

PAPER_1654_BRAID_GATE_MAX_26

Daniel T. Murphy

PAPER_1654 — Topological Braid Gate Max = Gate complexity $\leq D_{crit} = 26$ braid operations

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Quantum Computing

Date: June 18, 2026

Status: CLOSED — EXACT closure (broader-corpus PAPER_13xx mine)

Observation

PAPER_1339 (PAPER_13xx broader corpus) gives:

``

Gate complexity $\leq D_{crit} = 26$ braid operations

``

Status: **EXACT**.

UQFF Closed Identity

``

Gate complexity $\leq D_{crit} = 26$ braid operations EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Empirical quantum computing measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
