

PAPER_1657_HOLOGRAPHIC_BOUNDARY_DIM_5

Daniel T. Murphy

PAPER_1657 — Holographic Boundary Dimension = D_boundary = D_BSFG – 1 = 5

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Holography

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_134x broader corpus)

Observation

PAPER_1343 (PAPER_134x condensed matter / quantum sector) gives:

``

D_boundary = D_BSFG – 1 = 5

``

Status: **EXACT**.

UQFF Closed Identity

``

D_boundary = D_BSFG – 1 = 5 EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Experimental holography measures this constant directly. UQFF supplies a structural derivation from the integer primitives.
