

PAPER_1706_ITER_R_A_3_1

Daniel T. Murphy

PAPER_1706 — ITER Aspect Ratio $R/a = R/a = D_{BSFG}/2 + F_{TRZ} = 3 + 0.1 = 3.1$ (ITER $R_{\blacksquare}=6.2$ m, $a=2.0$ m)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Plasma Fusion

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_1196 plasma fusion proof set)

Observation

PAPER_1196_S413 (PAPER_1196 Plasma Fusion Unified Proof Set) gives:

``

$R/a = D_{BSFG}/2 + F_{TRZ} = 3 + 0.1 = 3.1$ (ITER $R_{\blacksquare}=6.2$ m, $a=2.0$ m)

``

Status: **EXACT**.

UQFF Closed Identity

``

$R/a = D_{BSFG}/2 + F_{TRZ} = 3 + 0.1 = 3.1$ (ITER $R_{\blacksquare}=6.2$ m, $a=2.0$ m) EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

ITER design parameters are chosen by international fusion-engineering consensus. UQFF supplies structural integer-primitive forms demonstrating the parameters' deep mathematical origin.
