

PAPER_1727_NEUTRON_LIFETIME_BASELINE_833

Daniel T. Murphy

PAPER_1727 — Neutron Lifetime Baseline = $\tau_{\text{baseline}} = 100 \cdot K_{\text{MEX}} \cdot D_{\text{phys}} = 833.333 \text{ s}$ (integer-primitive baseline)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Particle Physics

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_1240-1270 broader corpus)

Observation

PAPER_1254 (PAPER_1240-1270 broader corpus) gives:

``

$\tau_{\text{baseline}} = 100 \cdot K_{\text{MEX}} \cdot D_{\text{phys}} = 833.333 \text{ s}$ (integer-primitive baseline)

``

Status: **EXACT**.

UQFF Closed Identity

``

$\tau_{\text{baseline}} = 100 \cdot K_{\text{MEX}} \cdot D_{\text{phys}} = 833.333 \text{ s}$ (integer-primitive baseline) EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
