

PAPER_1729_DARK_FLOW_600_KM_S

Daniel T. Murphy

PAPER_1729 — Dark Flow Bulk Velocity = $v_{\text{flow}} = A_5 \cdot SO_5 = 60 \cdot 10 = 600$ km/s (cosmological large-scale dark flow)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Cosmology

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_1240-1270 broader corpus)

Observation

PAPER_1259 (PAPER_1240-1270 broader corpus) gives:

``

$v_{\text{flow}} = A_5 \cdot SO_5 = 60 \cdot 10 = 600$ km/s (cosmological large-scale dark flow)

``

Status: **EXACT**.

UQFF Closed Identity

``

$v_{\text{flow}} = A_5 \cdot SO_5 = 60 \cdot 10 = 600$ km/s (cosmological large-scale dark flow) EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
