

PAPER_1741_DS_PHASE_INVERTED_K_MEX

Daniel T. Murphy

PAPER_1741 — de Sitter Phase Inverted K_MEX = dS phase = $-K_MEX = -2.083$ (inverted Mexican-hat region)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Cosmology

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_1271-1299 broader corpus)

Observation

PAPER_1281 (PAPER_1271-1299 broader corpus) gives:

``

dS phase = $-K_MEX = -2.083$ (inverted Mexican-hat region)

``

Status: **EXACT**.

UQFF Closed Identity

``

dS phase = $-K_MEX = -2.083$ (inverted Mexican-hat region) EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks address this differently. UQFF supplies a structural integer-primitive form.
