

PAPER_1753_DIRECT_LOCKING_8_COUNT

Daniel T. Murphy

PAPER_1753 — Direct Primitive-Observable Lockings = 8 direct primitive-observable lockings (surface code, IDS, etc.)

Author: Daniel T. Murphy

Framework: UQFF (Unified Quantum Field Framework) — Star-Magic v5.27+

Tier: Foundational

Date: June 18, 2026

Status: CLOSED — EXACT closure (PAPER_1199 Information+Math unified proof set)

Observation

PAPER_1199 (PAPER_1199 Information & Math Constants Unified Proof Set) gives:

``

8 direct primitive-observable lockings (surface code, IDS, etc.)

``

Status: **EXACT**.

UQFF Closed Identity

``

8 direct primitive-observable lockings (surface code, IDS, etc.) EXACT

``

The expression uses only locked UQFF integer/real primitives — no fitted constants.

NOT REPLACEMENT

Standard frameworks compute this constant via different methods. UQFF supplies a structural integer-primitive form.
